

PROJECT PORTFOLIO: KENTUCKY LOCK & DAM 2010-2011

Location: Grand Rivers, KY, Tennessee River

Contractor: Thalle

ConCool Scope: Supply and install temperature control automation, supervise installation of wet belt and cement chiller.

After being awarded the contract by the USACE to construct the Grand Rivers Lock & Dam, Grand Rivers, KY on the Tennessee River, Thalle turned to ConCool to assist in the design of the overall concrete production system, assist in procurement of certain items, provide and install a sophisticated temperature control automation package, and supervise the installation and commissioning of all the equipment. ConCool was able to re-engineer and bring to maximum efficiency all systems.
